TRADEFLOW® GLOBAL AIR

Tradeflow Shipment Management Centre and Expeditors Global Air Integrated Services

Tradeflow

Tradeflow's Shipment Management Centre is a web-based tool designed to book shipments electronically, create import notifications, generate and upload documents and also distribute the booking data and documents to Trade Partners. This solution offers efficiencies in shipment execution for logistics managers that desire consistent and streamlined processing when using one or more logistics providers.

Available over the Internet 24 hours a day, access to Tradeflow is controlled by an assigned administrator and system roles can be defined on a user basis. Shipment bookings are automated and documents and notifications are effortlessly distributed reducing miscommunication and cycle time disruptions.

Expeditors Global Air

As Expeditors has evolved into one of the largest airfreight forwarders in the world, with 185 offices worldwide; air export services are provided to every major continent including North America, Latin and South America, Far and Middle East, Indian Sub-Continent, Europe, Australia/New Zealand and South Africa. As an IATA agent for all major airlines, Expeditors global network of experienced professionals in every major city of the world assures you of responsive service and thorough, accurate documentation.

Expeditors provides a full range of air freight products and services including airport to airport, door to door, door to airport, free domicile, airport to door, consolidation, direct IATA, and dangerous goods handling.

A comprehensive solution for importers and exporters global airfreight booking, document creation and distribution process is the collaborative and integrated services of Tradeflow's Shipment Management Centre and Expeditors Global Air services.

Tradeflow's online booking application, the Shipment Management Centre, allows the importer and/or exporter, depending on their level of integration, the ability to create bookings manually through the user interface or upload the data from the company's ERP or other internal systems (generally used to book a shipment). Tradeflow's ability to create templates increases efficiency and productivity for the high volume, repetitive shipments.

Greater efficiencies are gained when an importer and/or exporter grants Tradeflow access to an integrated trading partners, such as Expeditors Global Air. The bookings can be made on-line, and automatically transmitted to Expeditors to complete the booking and move the freight from origin to final destination and delivery. With on-line access to bookings in the Shipment Management Centre, Expeditors Global Air can create the shipment documents, and distribute them to the appropriate trading partners. Importers and Exporters also have the capability of attaching documents and images created through their own internal systems.

Through integration with the other Tradeflow applications, the Shipment Management Centre supports trade compliance through Trade Party Screening, product classification, and license determination; ensuring compliance and accurate, timely documentation, expediting customs' clearance and delivery.

Importers and exporters can control the integrity of their data and eliminate redundancies by allowing controlled access to their trading partners.

By combining the system resource of Tradeflow, and the global expertise of Expeditors in Air services, customers are provided a comprehensive service that allows efficient, electronic air shipment bookings, timely and accurate document creation, and compliance driven control of trade partners.

Please contact your local Expeditors sales representative for more information about our technology advantages.
