

Shipment Management Centre

Tradeflow's Shipment Management Centre is a web-based tool designed to book shipments electronically, create import notifications, generate and upload documents and it also distributes the booking data and documents to Trade Partners. This solution offers efficiencies in shipment execution for logistics managers that desire logistics providers.

Available over the Internet 24 hours a day, access to Tradeflow is controlled by an assigned administrator and system roles can be defined on a user basis. Shipment bookings are automated and documents and notifications are effortlessly distributed reducing miscommunication and cycle time disruptions.

With access and knowledge to the ever-changing trade environment, a competitive advantage is gained through the use of Tradeflow's Shipment Management Centre that will help you:

- Increase speed and accuracy through online bookings.
- Improve efficiencies through automated document creation and distribution.
- Assure integrity of the information used by pulling current product and trade partner data.
- Build booking templates eliminating repetitive data entry for recurring shipments.

- Distribute documents to multiple parties simultaneously, and keep parties informed as information changes.
- Allow resources to focus on value-added activities.
- Upload data from company ERP or other internal systems to book a shipment in seconds.
- Eliminate redundancies by allowing controlled access to your vendor, broker, or forwarder.
- Support trade compliance through Restricted Party Screening, Product Classification, License Determination and Document creation.
- Reduce communication errors and time-consuming calls, faxes and e-mails.
- Comply with import and export country requirements by displaying data and printing documents in multiple languages.
- Decrease time spent processing shipment documents and reports that can be generated or sent via the Shipment Management Centre.

Streamline your booking and documentation creation and distribution processes with Tradeflow's Shipment Management Centre.

Contact your local Expeditors office and ask for the Tradeflow Regional Customer Solutions Manager for further information.
